5 SIGNS YOUR DOG NEEDS A VET TODAY

Dogshide discomfort well.Know whenwatchful waitingis unsafeand same-day veterinarycare matters.

SWIPE →

01

Laboured or noisy breathing at rest

Heavy panting without heat, flared nostrils, or pale gums mean your dog needs urgent oxygen and triage.

02

Sudden collapse or seizure episodes

If your dog cannot stand, loses awareness, or shakes uncontrollably, keep them safe and call an emergency clinic.

03

Hard, swollen belly with retching

A tight abdomen and repeated gagging without vomiting can signal dangerous bloat. Seek emergency care immediately.

04

Repeated vomiting orbloody diarrhoea

Multiple episodes in a day especially with blood, weakness, or refusing water —can quickly dehydrate puppies and seniors.

05

Atechocolate, grapes,or medicines

Human painkillers, onions, xylitol, or household cleaners require prompt vet guidance. Never induce vomiting unless instructed.
